

Universal Bur Blocks

Increase efficiency and organization

- The wide color selection allows clinicians to organize their rotary instruments by procedure.
- SS White® Universal Bur Blocks are autoclavable and can be used with diamonds, carbides and polishers.
- The use of bur blocks minimizes damage to instruments and reduces the likelihood of injury from sharp instruments, while creating ideal procedural organization.

"Chairside efficiency is greatly maximized by using the SS White Universal Bur Blocks. I can customize my rotary instruments by procedure, insuring I always have the proper selection at my disposal." - Dr. Howard Glazer
